

Since its establishment, the University has worked on development of international relations and for that purpose certain agreements are signed. The core aim of the University of Travnik is establishing and developing cooperation with other universities, both in the country and abroad, as well as other international organizations that are engaged in the higher education field. Therefore, International Cooperation is an area that will in the future be one of the first objectives of this University. Activities on full implementation of the Bologna process, as well as activities on affirmation of the European dimension should be based on the fact that: the power of Europe and the world is in uniting education and finding ways for harmonization.

Considering that the above-mentioned activities have extensive consequences for the entire society, a special engagement of, not only the academic community in B&H, experts and competent ministries of education and science, but also the governments of all levels and the society as a whole is needed. International cooperation of the University is created and implemented by the Vice-Chancellor for International Cooperation, International Cooperation Office, as well as contact persons for international cooperation at the University, pursuant to the Strategy on International Cooperation of the University.

Hand in hand with creating the mutual market and development of entrepreneurship culture, another priority of EU countries is establishment of joint European Area of Higher Education and European Research Area. Accordingly, the University has already made the first actual steps in connecting with universities in B&H, neighboring countries, regions and the European countries.

At the University of Travnik there are already developed shapes of international cooperation with European projects, bilateral agreements, joint programs. International Office is very active in promotion of the University of Travnik through different promo materials. The contents can be found [here](#).
